### **DETAILED ACTION**

This office action is in response to applicant's reply filed on October 28, 2008.

#### ***Status of Claims***

Claims 22-38 are currently pending and are the subject of this office action.

Claims 22-38 are presently under examination.

#### ***Priority***

The present application is a 371 of PCT/EP04/06070 filed on 06/04/2004, and claims priority to provisional application No. 60/476,376 filed on 06/06/2003.

#### ***Rejections and/or Objections and Response to Arguments***

Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objections are either reiterated (Maintained Rejections and/or Objections) or newly applied (New Rejections and/or Objections, Necessitated by Amendment or New Rejections and/or Objections not Necessitated by Amendment). They constitute the complete set presently being applied to the instant application.

#### ***Claim Rejections - 35 USC § 103 (Maintained Rejection)***

Claims 22-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cools et. al. (Cancer Cell (May 2003) 3:459-469).

The reasons for this rejection have been provided in the previous office action dated April 28, 2008, the text of which is incorporated by reference herein.

Applicant's arguments have been fully considered but are not persuasive.

Applicant argues that the prior art (Cools et. al.), although suggests the utility of treating FIP1L1-PDGFRalpha-induced myeloproliferative diseases with PKC412 (compound of formula VII of the instant application, and also known as Midostaurin), the prior art does not anticipate or suggest to administer midostaurin in cycles.

Examiner's response: Cools teaches all the limitations of the instant application, including appropriate dosages of administration. It also teaches the administration of PKC412 in one day cycles for one week (see page 462 under PKC412 is efficacious for the treatment of both....., see also page 468, left column, first paragraph). Although Cools does not teach the exact cycles of dosage as the instant application, it's within the capability of the ordinary artisan to determine the dosage administration of a particular drug based on the observed clinical effectiveness, thus resulting in the practice of claims 22-38 with a reasonable expectation of success.

### ***Conclusion***

No claims are allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
